PROFESSIONAL SUMMARY

Senior Software Developer with 7+ years of experience building web, mobile, and desktop applications across communications, e-commerce, and services platforms. Specializes in full-stack development, with hands-on experience integrating AI capabilities, including RAG and the OpenAI API, into production systems. Comfortable working cross-time zone on distributed remote teams, with a track record of writing clean, scalable code and shipping reliable software that holds up in production.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, Python, HTML5, CSS3, SASS, MySQL, C#

Frameworks & Libraries: Vue.js (v2 & v3), Nuxt.js, React.js, Node.js, Express, Laravel, Lumen, Flutter, Tailwind CSS, UnoCSS, VueUse

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Docker, Vite, Webpack, Vercel, Netlify, Figma, VS Code, JetBrains IDEs

AI & Emerging Tech: RAG (Retrieval-Augmented Generation), OpenAI API, GitHub Copilot, OpenAI Codex

Other: WordPress, REST API design, Agile/Scrum, responsive design, cross-browser compatibility

WORK EXPERIENCE

Senior Software Developer | **VOCPhone**

Nov 2021 – Present

36 Ricketty St, Mascot NSW 2020, Australia (Remote)

- Design and build full-stack features in Laravel, Vue.js (2 & 3), TypeScript, and Node.js, translating user stories into production-ready code for a distributed, cross-timezone team.
- Integrate AI-powered functionality, including RAG pipelines and the OpenAI API, into core product workflows to extend platform capabilities.
- Develop and maintain supporting services in C#, Python, and PHP alongside the core JavaScript/TypeScript stack.

Software Developer | **Webinarinc**

Mar 2021 – Nov 2021

Remote | Pasadena, CA, USA

- Maintained and extended large-scale production systems end-to-end, covering both frontend and backend.
- Built new web applications and website features for external clients from the ground up.
- Delivered production-ready code using Laravel, Vue.js, JavaScript, TypeScript, SASS, HTML, and CSS.

Software Developer | **UTalk Philippines**

Aug 2019 – Apr 2021

Abanao Square, Baguio City, Philippines

- Maintained production systems and services, reducing the rate of bugs and system errors.
- Built and managed front-end and back-end code across a range of client projects.
- Worked across Vue.js, AngularJS, CodeIgniter, Lumen/Laravel, MySQL, MongoDB, JavaScript, PHP, and Ruby on Rails.

Web Developer | **Dap-ayan Eatery La Trinidad Benguet**

Aug 2018 – May 2019

La Trinidad, Benguet, Philippines

- Built a restaurant order-management system in PHP and JavaScript as part of an OJT placement.
- Developed features for order intake, menu management, and status tracking.
- Gained hands-on experience in database handling, UI design, and workflow optimization for real-world operations.

- Strengthened core software development and problem-solving skills on a live, in-use application.

UI Designer & Web Programmer (OJT) | ILearn Skills Development Academy

Aug 2018 – Dec 2018

La Trinidad, Benguet, Philippines

- Created magazine layouts and visual materials using Adobe Photoshop and Illustrator.
- Edited video content using Adobe Premiere Pro.
- Implemented web functionality in JavaScript and PHP, applying structured, logical problem-solving.
- Combined design and development skills to deliver projects that were both visually polished and functional.

EDUCATION

Bachelor of Science in Information Technology

Aug 2016 – May 2019

Kings College of The Philippines | Majored in Web Technology and Project Management
